Covid-19 Response Update for August 11, 2020

Arkansas Department of Education (ADE) has partnered with Arkansas Center for Health Improvement (ACHI) to establish analytic surge capacity support to provide district-level data to include a weekly feed of positive COVID-19 cases by geographic location. Data points will include cumulative cases per school district, active cases per school district, and rates of testing assigned to the counties in that time period. ADE is looking at rolling it out sometime this week.
